SUMMARY

DevOps Engineer skills with strong experience in automating, deploying, and managing scalable web applications on cloud infrastructure. Proficient in CI/CD pipelines using Jenkins, GitHub Actions, GitLab, and container orchestration via Docker and Kubernetes. Hands-on expertise in Terraform and Ansible. Skilled in AWS services, Linux administration,monitoring with Prometheus and Grafana, and securing applications using Nginx and Certbot.

SKILLS

- Linux(advanced), Docker, Kubernetes, Jenkins, Ansible, Terraform, Helm Charts.
- Python, Bash, Git, GitHub-Actions, CICD Pipelines, Prometheus, Grafana, boto3, AWS
- SSL, DNS, Certbot, Nginx, API, Postman.

WORK EXPERIENCE

Webkul Software Pvt. Ltd. **Dec 2022 – Present**

Noida, Uttar Pradesh

- Designed and implemented CI/CD pipelines using Jenkins and GitHub Actions to automate build, test, and deployment workflows across staging and production environments.
- Deployed and managed containerized web applications using Docker and Kubernetes, implementing CPU-based auto scaling and persistent storage for application data.
- Utilized Python and Bash scripting to automate server operations, deployment tasks, and infrastructure maintenance.
- Provisioned and managed AWS infrastructure (EC2, S3, IAM, VPC) using Terraform, ensuring consistent, version-controlled infrastructure with reliable state management.
- Automated REST API testing using Postman, enabling streamlined execution and validation of end-to-end API.
- Configured domains, DNS records, and SSL certificates, and deployed secure, high-availability applications using Nginx as a reverse proxy and web server.

NIELIT,Internship **Jun 2019 – Jul 2019**

I had done hands-on training in Python programming with successful project certification. *Gorakhpur, U.P.*

PROJECTS

JenkinsCicd | ***Jenkins, Odoo, Nginx, EC2, Bash script.***

- Implemented a Jenkins-based CI/CD pipeline to deploy a containerized web application on AWS EC2 using Nginx, automating build, configuration, and release processes for zero manual steps.
- Developed Bash scripts to automate SSL certificate renewal, post-deployment email alerts, and routine server tasks, eliminating operational overhead and improving deployment reliability.

OdooDockerSuite | ***docker, Nginx, Certbot, Bash, EC2***
